Subject: HG review for Jeff Jones and Painted Summer Hills LLC

Mark,

I've completed my hydrogeologic review for the Douglas County Conservancy Board ROD CG4-29196P@2 (Jeff Jones and Painted Summer Hills LLC).

After review of Mr. Reiersen's March 8, 2013, technical memorandum, available well logs, geologic mapping, local topography, and surface water features, I concur with Mr. Reiersen's findings that:

- The authorized wells and the proposed well (Flanagan) tap the same body of public groundwater; AND
- The use of up to 160 gallons per minute (gpm) and 48 acre-feet per year (afy) from the proposed well, under G4-29196P, will not result in the impairment of any existing ground or surface water rights.

I noted that the boards ROD appears to authorize up to the 1,800 gpm and 620 afy from the proposed well. However, the impact/impairment analysis performed in support of the ROD was limited in scope to 160 gpm and 48 afy. Consequently, I recommend that 160 gpm and 48 afy be considered as upper limits of use from the proposed well at this time.

If the applicant or board wish authorization for the full permitted amounts from the proposed well (1,800 gpm and 620 afy), I recommend they perform an impact/impairment analysis at these higher values.

Let me know if I can be of any further assistance.
